Advanced Dynamic Anatomy: Bridging the Gap Between Anatomy and Treatment

Course Objectives

At the completion of the seminar, the participant will be able to:

- Confidently palpate and correctly differentiate each of the muscles covered in class in the upper extremity, trunk and lower extremity
- Independently demonstrate how 10 muscle dysfunctions relate to common symptom patterns found within the body
- Correctly and independently state and locate the origin and insertion of each of the muscles covered in the class
- Describe at least 5 functional synergist patterns
- Independently state at least 3 possible drivers of a dysfunction based on clinical presentations

Greg Kopp, PT, MPT, OCS, CIMT

Greg graduated with his MPT from Oakland University in 1995. He has guest lectured at Oakland University on ACL/PCL surgeries and rehab, and served as a teaching assistant at Oakland for examination procedures

and therapeutic exercise. Greg is currently appointed as a clinical instructor for Oakland University. His treatment approach is eclectic, utilizing Kaltenborn and Paris manual techniques, and muscle energy techniques learned at Great Lakes Seminars. He has used this approach since 1995 working in outpatient orthopedic settings with a very diverse patient population, including sports medicine. Greg's treatment philosophy is to treat the driver of the patient's condition/pathology, and to teach the patient to manage their own condition. He also has an extensive background in weight training and exercise.
